

PC HORROR GAME DEMO

Hot & Heavy

STORY BASED ON

Resident Evil

Zombies are humans resurrected from the dead, mostly due to T-Virus infection. Symptoms of the T-Virus include mutation and progressive skin decay. They are known as "Zombies" due to their grotesque, corpse-like appearance. They wander in search of human flesh, their only source of nutrition, as they constantly require vast amounts of energy to sustain the sudden increase in metabolic demand. Although small amounts of damage will not deter a Zombie, they can be terminated by destroying the head.
